

SPRINT DELIVERY 4

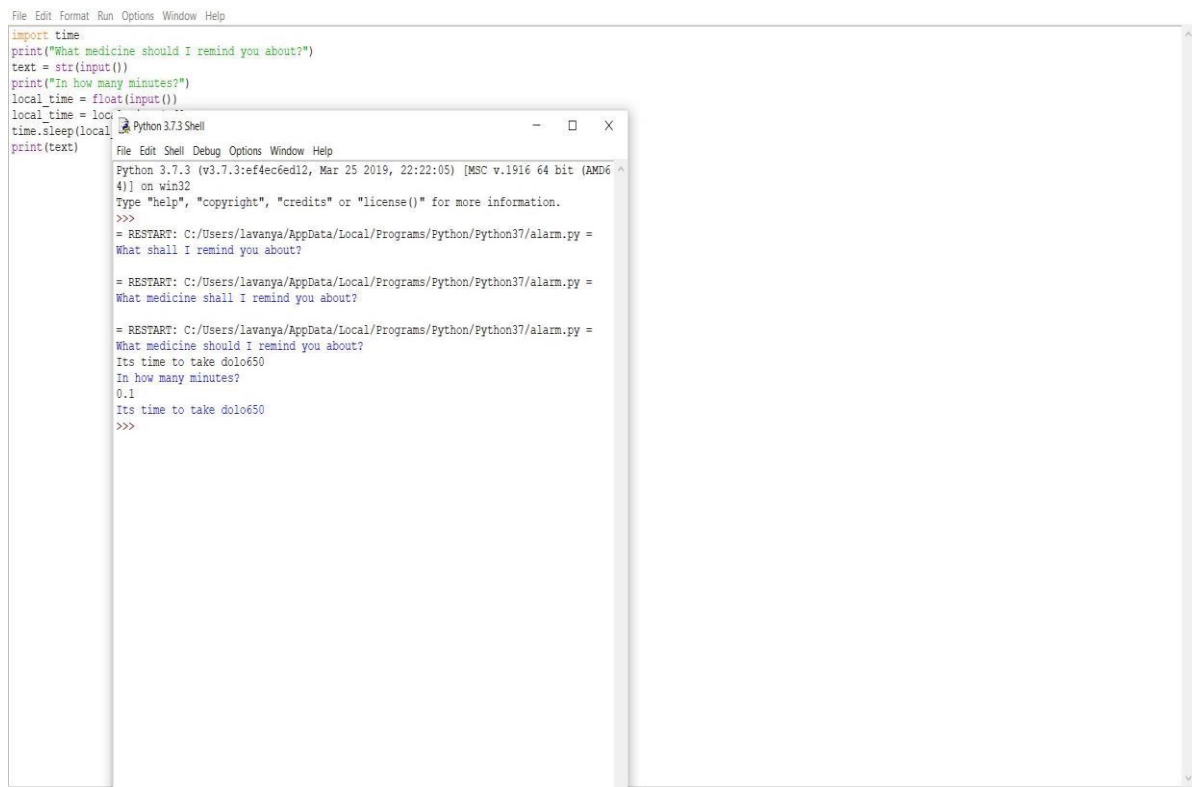

TEAM ID: PNT2022TMID25041

CREATING AN ALARM REMINDER USING PYTHON

CODE:

```
import time
print("What medicine should I remind you about?")
text = str(input())
print("In how many minutes?")local_time = float(input()) local_time =
local_time * 60 time.sleep(local_time) print(text)
```

OUTPUT:

The image shows a screenshot of a Python script being executed in a Windows environment. The script is named 'alarm.py' and is located at 'C:/Users/lavanya/AppData/Local/Programs/Python/Python37/alarm.py'. The script prompts the user for the medicine name and the time in minutes. The output shows the script running successfully, with the user inputting 'What shall I remind you about?' and '0.1' minutes. The script then prints 'Its time to take dolo650' and 'In how many minutes?'. The output window is titled 'Python 3.7.3 Shell' and shows the following text: 'Python 3.7.3 (v3.7.3:ef4ec6ed12, Mar 25 2019, 22:22:05) [MSC v.1916 64 bit (AMD64)] on win32', 'Type "help", "copyright", "credits" or "license()" for more information.', '>>>', '= RESTART: C:/Users/lavanya/AppData/Local/Programs/Python/Python37/alarm.py =', 'What shall I remind you about?', '= RESTART: C:/Users/lavanya/AppData/Local/Programs/Python/Python37/alarm.py =', 'What medicine shall I remind you about?', '= RESTART: C:/Users/lavanya/AppData/Local/Programs/Python/Python37/alarm.py =', 'What medicine should I remind you about?', 'Its time to take dolo650', 'In how many minutes?', '0.1', 'Its time to take dolo650', '>>>'.

```
